### NATURAL GAS RATES TO CHANGE FOR ATMOS ENERGY CUSTOMERS UNDER SCHEDULED SUMMER NATURAL GAS FILING

Jefferson City (March 28, 2003)---To primarily reflect estimated changes in the cost of natural gas for the summer season, Atmos Energy Corporation customers in the former service area of the Greeley Gas Company will experience an increase in natural gas rates under a scheduled summer season filing reviewed and accepted by the Missouri Public Service Commission. This rate change, which will take effect on April 1, 2003, is interim subject to refund.

There are a number of key factors in the natural gas industry causing rates to go up. Some of these factors include: recent high crude oil prices, significantly lower natural gas storage levels and colder than normal weather the end of February into the first part of March. Natural gas storage inventories are problematic due to a rapid storage draw down at the end of the heating season. Current inventories are more than 50 percent below the 5-year average for natural gas storage. In addition, the Energy Information Administration says natural gas production for the first 10 months of 2002 was 2.6 percent below 2001 levels.

A residential customer currently pays \$0.3053 per Ccf (100 cubic feet of gas). Under this filing, the rate will increase to \$0.5571 per Ccf, an increase of approximately 25 cents per Ccf. The effect on a typical residential heating customer for the summer season (April through October) is an increase of approximately \$79 when compared to rates currently in effect.

Approximately 60% to 70% of a customer's natural gas bill reflects the cost of natural gas from wholesale suppliers. **The wholesale cost of natural gas** (the cost your local natural gas company must pay to its suppliers for natural gas) **is not regulated by the Missouri Public Service Commission.** The wellhead cost of natural gas is unregulated and is primarily driven by supply and demand. The Missouri Public Service Commission does have regulatory review authority to ensure that regulated gas companies make prudent decisions in securing natural gas supplies for their customers.

Atmos Energy Corporation serves approximately 560 natural gas customers in the former Greeley Gas Company service area in Bates County.
